Purchaser of OTON Token should be prepared to expect similar fluctuations, both down and up, in the price of OTON Token denominated in EURO («EUR»), US dollars («USD») or currencies of other jurisdictions. Such fluctuations are due to market forces and represent changes in the balance of supply and demand. Liquidity refers to the extent to which a market allows assets to be bought and sold where there is a steady flow of OTON Tokens buyers and sellers. Lower liquidity tends to generate a more volatile market (especially for large purchase and sale orders of OTON Tokens) and may cause more drastic price changes. In contrast, however, higher liquidity tends to create a less volatile market, and prices may not fluctuate as much. The Company cannot and does not guarantee market liquidity for OTON Token.

Additionally, due to different regulatory requirements in different jurisdictions and the inability of citizens of certain countries to open accounts at exchanges located anywhere in the world, the liquidity of OTON Token may vary from one country to another and this would likely be reflected in significant price discrepancies.
